About BlazeNet Ltd.

BlazeNet Ltd. incorporated by team of young technocrats, as an Internet Solution Provider our main focus is in providing Internet connectivity and developing customized Internet solutions for companies and organizations; incorporating cost effective Internet technologies to help companies gain a competitive edge in both local and global markets.

Founded in 1998 as an Internet Service Provider was among the first private Internet Service Provider (ISP) in Gujarat, India.

The years that followed BlazeNet played a major role in building Gujarat Internet infrastructure, earning the company a reputation for fast, stable Internet access and innovative Internet solutions for corporate customers.

BlazeNet, a leading **Internet solution provider,** has evolved into a full-range Internet and business solutions provider.

BlazeNet Limited - An Ethical Company

Whether you're an owner, employee, or IT professional, we take time to learn about your business, offer best advice and inspiration, and back it all up with world-class support.

We take pride to be the first ISP to use optical fiber network commercially in Gujarat, this is how we became pioneer in offering data transmission services to large enterprises, multi-nationals, financial institutes, govt. agencies, pharmaceuticals, education sectors.

End-2-End Solution with Advanced Optical Fiber Network Technology & Backed up by Wireless MIMO connectivity

We gained in-depth knowledge for last 20 years, we know downtime means great loss for any business therefore the network was designed with low latency and backed by highly reliable redundant backbones; we assure our customers operation can run smoothly, efficiently and without interruption, the quality and reliability of our services is guaranteed in terms of service levels.

At present, we are able to connect you to virtually anywhere in the North-West India Viz Delhi, Rajasthan, Gujarat & Mumbai & Pune with Point to Point or Multi-point Connectivity offering b2b services such as Dedicated Internet Access and supported by our experienced & certified professionals trained in understanding the respective data transmission environment, including local regulations and procedures.

With our converged network infrastructure that cost-effectively delivers new and future services. Our network supports the bandwidth and network requirements for any organizations small, medium or large.
